

Client Side Delegate Authorization Guide

Following the steps to do client side delegate authorization.

1. Install Sentinel Runtime Environment

To remote authorize HiAPI, **Sentinel Admin Control Center**(ACC) is required on the local computer. Install Sentinel Runtime Environment to have the ACC on the local computer.

- On **Windows**, run *windows/win_install.bat*. It needs administrator privilege.
- On **Linux**, install the proper package in *linux* folder. It needs administrator privilege.

2. Configure Sentinel Admin Control Center

Open 127.0.0.1:1947 by browser. Execute the following:

- Go to **Configuration/Access to Remote License Managers**. Set **Remote License Search Paramters** to {LicenseServerIP}. Press **submit**.
- Click the options on **Configuration/Access to Remote License Managers**. Press **submit**.
